Dear Mr. Hayman:

I am the Office Manager at Notchview Dental Group and had an AiroCide system installed in our offices during September 2004. I believe that during the winter of 2004 – 2005 after the installation of the AiroCide system my staff did not share as many colds and viruses as they had years past. When one of my staff members came down with a cold they kept it to themselves instead of spreading it through the office as they had always done in the past.

Notchview Dental has always had a moldy smell for the entire nine years that I have worked here. Within a few days of the AiroCide system being installed in our office the moldy smell is gone. I also have noticed, as well as all three of the Dentists that work at Notchview, that we all have much more energy in the afternoon and do not feel sleepy anymore.

Best regards,

Tami Brandl
Office Manager
Notchview Dental Group
